

What is Lap Band?

What is Lap Band?
Lap Band Adjusts Stomach

When you first look into considering surgery to assist you in losing weight, your likely first question is just what is Lap Band surgery?

The premise of Lap Band surgery is to install an adjustable silicone band around the upper portion of the stomach, which then forms a small pouch in the stomach, leaving the bigger portion of the stomach located below the band. Filled with saline, the band is a hollow ring that can be adjusted by a visit
